

Stockholm January 11, 2005

Dear Partner/Customer,

I am pleased to announce that Zoomon Mobile Solutions AB has changed name to Ikivo AB. The name change has no effect on existing agreements as the company entity remains the same, but from now on please refer to Ikivo in all correspondence.

With Ikivo, we plan to move into a new phase of market and operational excellence as we build upon the technology and product leadership we have created and sustained over the years. Mobile Scalable Vector Graphics has become a market reality with over 30 mobile phone models already shipping with the Ikivo SVG Player.

In fact we are pleased to announce that in conjunction with our name change we are launching a new product for the content creation and authoring community, Ikivo Animator. Integrated into the Adobe Creative Suite. Ikivo Animator enables the design and deployment of professional animated content to mass market mobile phones. For more information on Ikivo Animator please go to www.ikivo.com/animotor

Yours sincerely

A handwritten signature in blue ink, appearing to read "Stefan Elmstedt".
